The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connect the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:
- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

</table>
SESSION 4  ANALYSIS AND APPLICATIONS II

10745 OI  Toward semantic loop closure in simultaneous localization and mapping systems [10745-16]

10745 OJ  Optic design and manufacturing issues of a high numerical broadband IR solid immersion microscope objective [10745-17]

10745 OK  Optical design and predicted performance of the WFIRST phase-b imaging optics assembly and wide field instrument [10745-18]

10745 OL  Novel designs for minimizing diffraction effects of large segmented mirror telescopes [10745-19]

SESSION 5  SOLID STATE LIGHTING

10745 OM  CCT stabilization and phosphor temperature detection in pc-WLEDs (Invited Paper) [10745-20]

SESSION 6  ANALYSIS AND APPLICATIONS III

10745 OR  Tunable GRIN PDMS-made lenses with aspheric profile [10745-25]

10745 OT  Optomechanical system to induce low-order refractive errors on a biconical surface [10745-27]

POSTER SESSION

10745 OV  Comparison between the Arclight Ophthalmoscope and a standard handheld direct ophthalmoscope: a clinical study [10745-29]

10745 OX  Optical design of CCF PlanApo microobjectives 50-mm observation and super long working distance [10745-31]

10745 OY  Optical designs of the objectives for special studies in polarizing microscope [10745-32]

10745 OZ  Design of ergonomic handpieces for a CO₂ laser system for surgical and cosmetological applications [10745-33]

10745 10  The design of the prism film on the optical concentrator for photovoltaic applications [10745-34]

10745 11  Optical coatings for the optical concentrator with the prism film [10745-35]

10745 12  Abbe experiment with inclined grating [10745-37]
Reducing the reabsorption effect in an optical concentrator by using a luminescent layer with multiple phosphors [10745-38]

Design and analysis of the mirror system with off-axis field-of-view [10745-39]

Optimizing trefoil phase plates design for color wavefront coding [10745-40]

Implementation of a wavefront coded microscope by the use of a spatial light modulator [10745-41]

Design of an adaptive Fresnel lens using design thinking methodology and cost analysis [10745-42]

Design of lens hoods for the "Lira-B" space telescope [10745-43]
