Peter Drucker, the management guru, observed that the corporate environment today is ruled by the 3 C’s: ‘accelerating change, overwhelming complexity and tremendous competition’. The corporation that survives or wins know they have to hire and retain the best. That is not always easy. They have no choice but to turn to consultants and executive coaches who have the aura, skills and techniques to evoke excellence in their people.

What I really like about this book is that it distils coaching into five powerful and practical strategies, viz. how to forge a partnership; inspire commitment; grow skills; promote persistence and shape the environment.

Unlike many books in this field, Leader as Coach recognises that you are a busy Coach who has limited time for reading. So it does not tie you down to a long read before you get to the heart of the matter of what interest you. The format of the book make for easy reading, starting every chapter with a ‘Jump-Start’ section as well as listing ‘Strategies’ that you can adopt to deal with different coaching scenarios.
