This therefore necessitated the implementation of the project in two urban slum areas in Uganda with the aim of improving the health status of the inhabitants through conducting community proactive and sustainable interventions targeting two priority problem areas of access to safe drinking water and improved sanitation facilities. The project team carried out routine sanitary inspection of water sources to identify hazards in the water supply system that had the potential to contaminate them. The findings from water quality analysis were regularly shared with community members. Indeed, the use of Aquasafe greatly increased in the communities during the project which further promoted drinking safe water. 3.2.5. Promotion of Hand Washing.
